NOTICE.
JAPAN EMIGRATION CO.
OF OSAKA,

This is to inform the Planters that I have made connections with the

4. We refund a pro-rata sum of money for any period of the contract which may remain after the desertion of the laborer.

We have connections with the **JAPAN MAIL STEAMSHIP CO.**, calling here monthly, the **TOYO** and **NAN YO MARU** and another line about to be established.

Following are the persons who compose the company:

CHI A CABINETS.

An Attractive Eccectate For a Side Wall In Dining or Living Room.
Not so very long ago an illustrated article in THE LADIES' HOME JOURNAL suggested a number of attractive cabinets and corner shelves for the display of dainty china and bric-a-brac. These designs were all of such a nature that a carpenter could make them at a moderate cost. They may be of hard wood, finished nicely to match the door and window casings in the room, or they may be of pine or whitewood, and painted any color.

CABINET WITH TWO SHELVES.

To hold them in place, and a cornice molding and deck rail to elaborate the top shelf.
These wall shelves may be made of four pieces of pine board securely fastened together. The lower end of each side piece is cut in the form of a bracket, and around the top shelf a molding is mitered and fastened with steel wire nails and glue. The little deck rail can be made of round or square sticks, but perhaps the best result can be had by using square pieces.

The woodwork may be given several successive coats of enamel paint of some light shade, and if the side pieces are decorated with sprays of flowers or fruit nicely painted in oil colors a beautiful effect is given. A curtain and some odd and pretty pieces of old china will complete a pretty china cabinet.
Great care should be observed to fasten cabinets securely to the wall, as it will necessarily be a heavy one when filled with china and bric-a-brac.

New Fingerings.
An eminent teacher writes as follows in The Etude: It sometimes happens that one gets almost hopelessly "tied up" on a particular passage. It has been learned wrong, and wrong it goes every time it is attempted. This is all inexcusable, of course, and usually means that some very careless practice has been permitted, but it does occur, and it is worth while to have as many ways of overcoming the trouble when present as possible. In such cases it is worth while to study out a new fingering. The fingering learned may be the best possible for the passage, but it rarely happens that it is the only one. Make some change and go through the passage as if it were a new one, slowly and carefully and absolutely the same way every time. This may not only accomplish the desired result of curing the bungling, but it may even make it possible to return to the first fingering after a time with advantage and with all the faults removed.
